

## smartserve™ & smartreturn™

### receipt rolls for bibliotheca RFID products

bibliotheca can supply a range of receipt rolls, compliant to each product in the smartserve™ and smartreturn™ range. The paper has a nontoxic direct thermal top coating and is made from wood pulp from sustainable forestry.

bibliotheca has worked in partnership with the design team to ensure the paper is of superior quality and fit for purpose with the printers in the kiosks. The paper is 60gsm and as a result will not curl or jam in the dispenser. Once printed the paper is 100% recyclable and can be disposed of in any paper collection.

Optionally, to add value to your receipt roll and to raise library revenue, bibliotheca has the ability to print on the reverse of the roll. A 1/2 or a full colour process advert can be printed to display a retailer, or even advertise other library services.
